

Payment Card Industry services

atsec - an Independent, standards-based information technology security services company

The PCI services are offered by atsec China

Who are we?

- The company was founded in January 2000 by three internationally-recognized IT security professionals
- atsec has been directly involved with Payment Card Industry since 2007
- Our people have many years of information security related experience, and industry qualifications
- Related Services include:
 - Penetration testing
 - Source code review
 - Vulnerabilities assessment
 - Cryptographic algorithm implementation testing

atsec's business principles

Professional

atsec knows the worldwide information security consulting business very well. With a multinational staff, it is only natural that we feel comfortable operating internationally. We are a company with global reach.

Integrity

Information security consulting and evaluation is a high-integrity business, integral to which is the matter of trust. All atsec employees are committed to sustaining the highest degree of integrity in our client relationships. We are devoted to delivering the highest quality in a timely manner.

Focused

atsec consultants are information security consultants. As such, atsec focuses solely on information security consulting. We do not consult in any other areas, and we do not sell hardware, software, or any other ware.

Independent

We are not affiliated with any hardware or software vendor, and we never will be. Our credibility as consultants hinges on that independence. Our customers can rely on us to be objective. We have no interest in selling anything other than our security expertise.

We provide services in all IT security areas

Evaluation, Testing and Assessment

Compliance and Audit

Consulting services

Differentiators

- atsec's staff are world renowned for competence in their field and atsec has an unsurpassed reputation for quality
- We take time to understand your problems and use that knowledge to innovate and design solutions that give satisfaction.
- Quality: We are ISO 9001, ISO/IEC 27001 and ISO/IEC 17025 (CNAS) certified ourselves.
- We understand that being on time can make all the difference.
- We are independent of external influences, from finance to “partnerships” with product vendors.
- Synergies: If you need other testing/audit including Common Criteria, FIPS 140-2, SOX, GDPR, etc, atsec maximizes reuse of evidence and timing of testing ensuring cost savings
- atsec leads the information security industry, contributing to international standards development and advising schemes and programs about the state of the art of information security
- atsec has global reach

atsec China's PCI services

Qualified Security Assessment

- Authorized to offer service in Asia Pacific, Europe, USA, Canada
- We provide on-site assessment against the PCI DSS
- Projects typically last 3-4 months
- Costs vary depending on network and organization complexity and the number of sites assessed
- Deliverable includes the AoC (Attestation of Compliance)

Approved Scanning Vendor

- We provide vulnerability scanning in accordance with PCI SSC procedures
- We are NOT a mass-market scanner. We take the time to discuss your requirements and advise you on the results
- Projects typically last a minimum of one year with four quarterly scans
- Costs vary depending on the number of externally facing IP addresses
- Deliverable includes Executive Report and Technical Report

Payment Application Assessment

- atsec has unparalleled experience in evaluating and testing software applications – From mainframes to embedded systems
- In PCI industry, we assess and validate payment applications for compliance with the PCI PA DSS
- Projects typically last 8-12 weeks
- Costs vary depending on complexity and the number of platforms assessed
- Deliverable includes the AoV (Attestation of Validation), and the validation result will be listed by PCI SSC on the official website.

Confidence in atsec

We offer gratitude to the **many** companies, large and small, who help atsec thrive and **trust us** with their PCI needs
